Service après-vente

e-Réputation

Alongside our Design Director and working closely with our Project Managers and Marketing Department, your creativity will ensure our vision of new websites comes to fruition.

Main Duties :

1. You will be primarily involved with the graphical aspects of a website; how the site looks, and you may occasionally be involved with some technical aspects of a website such as HTML/ CSS coding.

2. You will also be responsible for the design, lay-out and coding of web site templates.

3. You may be involved with the maintenance and update of existing sites.

4. In order to design a website, you will:

Identify the type of content the site will host

Establish the purpose of the website based upon its target audience

Determine any functionality that the site must support, for example, whether it will handle financial transactions or enquiries.

Give guidance on layout, colours and styles. This will determine the type of technology to use and how complex the site will be.

Write the programming code (HTML, CSS, JS, Twig), either from scratch or by adapting existing website software and graphics packages to meet business requirements

Required profile :

Personality :

- Rigorous, organized and analytical turn of mind

- Entrepreneurial approach, team spirit
- Strong negotiator
- Strong communication and willing to join a growing company are mandatory on this position

Candidate Profile :

1. You will have experience in graphic/web design (HTML5, CSS3, JS Expertise a real plus). Some logo design experience would be ideal.
2. You are conversant with Adobe Suite (Illustrator, InDesign, Photoshop and other similar products).
3. You will have awareness of international web standards and protocols.
4. You will be able to produce examples from your portfolio providing relevant examples of your creativity.
5. Your desire to implement continuous improvement is equal to your curiosity and wish to discover new things.
6. You are creative, dedicated and display initiative.
7. You are looking to work within a close-knit team lead by our Partners who put innovation and success at the heart of our business.
8. You are comfortable tackling and quickly understand complex and evolving issues.
9. Autonomous, proactive, organised and self-motivated, you show determination and tenacity to achieve your goals.
10. You are dynamic, ambitious and hard-working.
