Management Officer

Job Description

You will work under the responsibility of a Senior Project Manager, in our corporate IT department, to make the applications and services suit Amaris growth. Your role is divided into 3 areas : agile project management, specifications gathering, technical and business interface. Agile project management : we take the best of SCRUM, Prince2 and PMI and tailor it to Amaris strong growth. Specifications gathering : we have to go beyond our internal clients' requests, anticipating the growth of each team, of each application database, page content etc. Technical and business interface : you have to understand the technical constraints and business added value of each backlog item, constantly aligning both visions.

- Usual ERP domains : Finance, HR, Internal Audit, Accounting, Legal
- Office Management Application, Travels Assistant, Events Assistant
- Recruiting application : Front Office & Back Office evolutions, links with the ERP
- Websites : Umbraco CMS (Dot Net)
- CRM : improve ergonomics and interface with day-to-day tools (agendas, smartphones...)
- Workstations monitoring application for a better quality of the IS
- Ergonomics of all our Information System should be improved, including mobile development
- Technologies : C# Dot Net, Razor, Entity Framework, Umbraco, Objective-C.

Ideal Candidate

With a master degree or engineer diploma, you have a previous technical experiences in development and architecture (.Net or Web environment), and also a good business vision you want to improve.

You are an organised and rigorous person, with a certain taste for quality in work. Young and dynamic, you want to blossom contributing to a company in full expansion. You are able to react quickly in front of problems and like to share your knowledge, your know-how and your point of view.

You will receive a personal training during your integration period in the company.

You have to master English and ideally another language (German or French).
