Iron Web Ltd is a technology savvy, fast paced, vibrant, young e-business start-up company. Established in 2014, previously based in Paris and Geneva, it is founded by experts in the recurring billing industry. We specialise in subscription services in a number of different sectors for example: e-learning, cloud storage, e-mail routing, SAAS, ticketing, gaming, legal advice and admin assistance (accounting software, visa driver's license administration).

Our expertise is deployed over 5 sectors relevant to e-Business subscription companies looking to increase their profitability:
Web Marketing
Web Development
Billing and Pricing engineering
Customer Service
e-Reputation

Working as a team we aim to create profitable solutions for similar e-business projects.

Recently, our head office relocated to London, opening newly furnished offices with a modern work environment, in vibrant Soho (Central London).

Most of our employees are native French speakers.

Assist with installation and configuration of network (switch, wifi, dhcp, firewall)
Assist with support of each person in the company (helpdesk).
Assist with configuration of internal hardware machine (desktop, laptop, servers)
Use of GLPI our solution for helpdesk (population of datas, maintening)
